Plant in good average garden soil. Spade up the ground several times as deep and large as the plant to be planted.

Place the eyes 2 to 2½ inches under the level of the ground. Place a handful of bone meal around each plant, mixing it into the soil.

Do not plant near trees or shrubbery. They like plenty of sunshine. Disbud the lateral buds for show flowers.

Cultivate frequently. Cover with straw or other litter the first year to protect from heaving.

IRIS PLANTING INSTRUCTIONS

Plant in good average garden soil to which add some bone meal and crushed limestone.

Plant the roots 2 to 3 inches under the ground and cover the body of the plant with not over an inch of soil.

Plant 12 to 15 inches apart. Reset every 3 or 4 years.
